

Paper Bag Luminary

Materials:

Paper bag (re-use one that you already have)

Scissors or hole punch

Pencil

LED tea light

1. Start with a lunch-sized paper bag. Re-use a bag that you already have. If you picked up one of our Discover the Night kits, that bag will work well.
2. Decide what kind of design you want to make. You can draw your design onto your bag with a pencil.
3. Cut out your design with scissors or use a hole punch. Only cut through one side of the bag.
4. Open up your bag.
5. Place a small LED candle inside.
